

*Environmentally
Friendly*

*Eliminates unsightly
and hazardous
lead weights*

Many truck fleets use powders or beads as a balancing agent.

LTB outperforms these competitive products *and* keeps tires cooler for longer life!

“Fluid Dynamics” and centrifugal force push the LTB towards the low spot in the tire, counteracting the high spot, and balances the tire.

See inside for more information about this easy-to-use, environmentally friendly, and time-saving product.

Balances Tires
Keeps Tires Cooler
Eliminates Rim Rust
Makes Dismounting Easier
Extends Tire Life

LIQUID TIRE B

THIS STUFF IS GOOD.

This product is so versatile, it adjusts to each driving condition as it changes and does it quickly for peak performance.

Speed changes, load variations, and cornering forces are a walk in the park for LTB. Even irregularities in the tire or wheel assembly are no match for Liquid Tire Balance from Delta First.

LTB extends the tire life by producing even tread wear. Never again will you need to rebalance a tire that has been treated with Liquid Tire Balance.

It's a liquid so tires will run cooler.

Will not affect your TPMS

Eliminates rim rust and wheel corrosion

Makes dismounting easier which preserves casings for retreads

Freeze protection to -40°F

Unlike beads and powders, LTB will not clog valve stems

Available in 20 oz. poly bags for easy application or quart bottles

Did we mention LTB is easy to install?
