TIRE SEALANTS

Sealitup® Heavy Duty

(502)

- Specifically designed for large tires on heavy-duty equipment
 - Permanently seals injuries up to 3/8" with virtually no loss of air pressure
- 5 man-made fibers for added thixotropic properties
 - No separation – stays in suspension
 - Saves casings for recapping
- Prevents and eliminates rust and corrosion
 - Keeps tires running cooler
 - Works to 15°F (-9°C)
 - Increases tread and tire life
- Eliminates rim, vent and pinhole leaks
 - Easily washes out with water
- No flammable components/No risk in retreading

Sealitup® Heavy Duty Cold Weather

(603)

- All of the same outstanding features of **Sealitup® Heavy Duty** except protects to -10° F (-23°C)!
- Specifically designed to work in extreme conditions:
 - > when a large number of punctures are expected
 - > in extreme temperature ranges, either hot or cold
- Contains large amounts of Kevlar-type fibers and crumb rubber
- Permanently seals injuries up to 3/8" with virtually no loss of air pressure

All Delta First
Tubeless Sealant
products contain a
corrosion package
that prevent rust and have extra
lubricant for easier
mounting and
dismounting.
